Programme Name: Bachelor of Science in Physics / Mathematics

Programme Description

This programme focuses on the laws of physics and fundamental mathematical concepts delivered through a coherent and interrelated structure of courses. The programme combines the study of mathematics and physics in a manner such that each discipline reinforces the other to give a strong and equal grounding in these two inextricably linked subjects. Students study the two majors in-depth with the content spanning across a range of topics across each discipline. The programme will equip students with skills that will allow them to interpret and extend observations related to many physical phenomena using the language of mathematics. This will open opportunities for careers in a wide range of areas including engineering, meteorology, mathematical modelling and energy advisors.

This Bachelor of Science in Mathematics/Physics programme consists of 24-course units amounting to 360 credit points. Students must complete all compulsory courses and elective courses.
