The University of Fiji

**Bachelor of Medicine
Bachelor of Surgery (MBBS)**

Path to Service and Care for Health

Mission

To produce efficient and dedicated doctors who fulfil the health care needs of the community by being effective healthcare problem solvers, efficient communicators, self-directed lifelong learners, professional and are community leaders.

Objectives

The objectives of the Bachelor of Medicine Bachelor of Surgery are to:

- Provide an overall introduction to the medical profession within an innovative and creative learning environment.
- Provide the link between professional skills and competencies, scientific knowledge, humane approach and clinical practice of high ethical standards.
- Facilitate the competence of analytic reasoning and the attitude of self-directed and lifelong learning.
- Produce an efficient health care professional with high scientific and moral standards (our graduates as good clinicians, good researchers, good managers, humanists and role models of high integrity).
- Provide community based educational opportunity for learning of social & environmental aspects of disease, health services in the community and other health related problems in Fiji and the Pacific region.
